

CHAPTER VIGOAL 19 - OCEAN RESOURCESINTRODUCTION

There is little question that the quality of ocean resources--primarily the potential for food production--is a vital interest of not only Lane County, but of the State of Oregon and the nation. Goal 19 mandates that the three levels of government be cognizant of, and maintain programs to, insure that this quality is not diminished or threatened by actions occurring either along the shoreline or in the water itself (particularly areas along the continental shelf).

NECESSARY ACTION

As cited earlier in this report, the Goal requires, in essence, that local governments (including Lane County) monitor activities which are likely to have an impact on ocean resources. Such activities might include offshore drilling for oil, construction of new ports or improvements of existing ones (jetty expansion, for example), power plant construction in coastal areas (including nuclear power plants), LNG (liquid natural gas) storage facility construction, fishing regulations, and so on. By definition, most of these activities go beyond the scope of County regulation; for example, Lane County would be consulted about the development of a power plant in the coastal area, or about offshore drilling off County territory, but final authority to permit or deny such proposals would rest with state and/or federal agencies.

The Goal, recognizing this fact, contains a comprehensive listing of those agencies with authorities over activities likely to affect ocean resources. State and federal agencies are specifically instructed to comply with the concerns of the Goal, and local governments are expected to be participants in the process. No specific local planning requirements are set forth beyond such participation.

Accordingly, no management unit designations are made in this report concerning Goal 19. Instead, some general policy statements are made to guide County action in accordance with Goal mandates.

GENERAL POLICIES

- A. Lane County shall participate fully in the review and decision-making process of state and/or federal agencies where ocean resources offshore of Lane County territory are likely to be affected.
- B. Lane County shall cooperate with state and/or federal agencies in developing the necessary information, including inventories and impact assessment, to allow these agencies to properly evaluate proposed actions and make decisions about whether or not to allow such actions.
- C. The County should consult with state and/or federal agencies having responsibilities under this Goal if actions are proposed within the County

(and for which the County has all or partial approval authority) which are likely to impact the quality of ocean resources in the area.

- D. The County should build and maintain an "information bank" consisting of state- or federally-generated information about ocean resources, using such information as it is supplied to the County. This information should be made available to County decision-makers in evaluating proposals which may affect ocean resources.
- E. Programs or regulations arising from County compliance with LCDC Coastal Goals 16 through 18 should be cognizant of, and seek to enhance the quality of, ocean resources as defined in Goal 19.

APPENDIX B  
NOV. 821Application of Lane County Coastal Compliance Zoning Districts.

The West Lane Planning Commission has held hearings and will make recommendations to the Board of County Commissioners about the adoption of several new zoning districts to be added to the Lane Code. The new districts are intended to meet the mandate of LCDC Coastal Goals (Goals 16-19), and implement the "Coastal Goals Compliance Report" presently pending adoption before the Board.

Following adoption of the districts themselves, they must be applied to the land. This report supplies necessary information on the application of the new districts.

Attached is a series of reports -- seperated by zoning districts -- which indicates what tax lots are being affected by a given zoning district, any underlying or pre-existing zones to be replaced or added to (some of the new districts are overlay or "combining" districts), the approximate percentage of the tax lots affected by the districts, and a series of maps illustrating the location of the property being zoned.

Following West Lane Planning Commission action on the application of the zones, the matter will go before the Board of Commissioners for further hearings and deliberation, and final action.

NATURAL ESTUARY DISTRICT (NE)

Purpose. The purpose of this district is to assure the protection of significant fish and wildlife habitats and the continued biological productivity of the estuary and to accommodate uses which are consistent with these objectives.

CONSERVATION ESTUARY DISTRICT (CE)

Purpose. The purpose of the Conservation Estuary District is to provide for the long-term use of the estuary's renewable resources in ways which do not require major alteration of the estuary. Providing for recreational and aesthetic uses of the estuarine resources as well as maintenance and restoration of biological productivity are primary objectives in this District.

DEVELOPMENT ESTUARY DISTRICT (DE)

Purpose. The primary purpose of the Development Estuary District (DE) is to provide for navigational needs and public, commercial and industrial water dependent uses which require an estuarine location. Uses which are water-related or nonwater dependent, nonrelated which do not damage the overall integrity of estuarine resources and values shall be considered, provided they do not conflict with the primary purpose of the district.

There are no tax lots covered by this district.

SHORELANDS

SIGNIFICANT NATURAL

Purpose: This management unit designates an area which may have a combination of physical, social, or biological characteristics which set it apart as essential to maintain in its natural state.
