 OFFICE OF LEGAL COUNSEL

ACCEPTANCE OF PARK ROADS

15.260 Acceptance of Park Roads. The following procedures and requirements are established for delineating a process for the acceptance of Park Roads into the County Road System.

(1) A Park Road is a public road providing access within a County park as defined in LC 5.500.

(2) New Park Roads established after January 1, 1991, shall be designed and constructed to comply with applicable County Road Standards as defined in LC Ch 15 and LM Ch 15 prior to Board action accepting that road into the County Road System.

(3) Notwithstanding LM 15.215 through LM 15.250 and the County Road Standard contained in LC Ch 15 and LM Ch 15, Park Roads established and existing as of January 1, 1991, may be accepted into the County Road System provided that road complies with County Road Standards or varies from County Road Standards as follows:

(a) A Park Road posted as serving one-way traffic shall have a minimum surface travel width of 12 feet provided it is posted, designed for and functionally serves one-way traffic.

(b) A Park Road serving two-way traffic shall have a minimum surface travel width of 20 feet.

(c) A Park Road shall have a minimum center line radius of 32 feet.

(d) A Park Road shall have a minimum right-of-way width of 60 feet, unless the Director recommends acceptance of right-of-way less than 60 feet but in no event shall right-of-way less than 40 feet be accepted.

(4) The Director of the Department of Public Works shall issue a written report describing compliance with the standards in LM 15.260(3) above for any proposed addition of park roads to the County Road System. If the Director recommends a modification or waiver of the standards, the Director shall include findings in the report that determine whether current and future roadway needs necessitate compliance with the standards and whether a safety hazard will be created if the roadway is accepted into the County Road System. The Planning director and the Parks Manager shall indicate concurrence with the Director's report but, in the event either does not concur, then the matter shall proceed no further and shall not be referred to the Board.

(5) If the Director determines standards for acceptance have been met or if the report recommends a modification or waiver of the standards, then the Director shall prepare and submit the necessary documents to the Board for consideration and action.
